

The flexible, **Microsoft** powered cloud solution

What is Azure Pack?

With Leaseweb's Azure Pack powered private cloud, you have the ability to easily offer a comprehensive, secure solution that seamlessly integrates with Microsoft services, without the need for major capital investments.

Looking for a flexible, secure cloud solution for your customers' applications that seamlessly integrates with Microsoft services? Look no further than Azure Pack.

Seamless Compatibility

Azure Pack seamlessly integrates with apps and services from across all of Microsoft's offerings, so you and your customers get the best of Microsoft with the power and scalability of the cloud.

Scalable and flexible

Easy to adapt to changing needs, packed with infrastructure building blocks, and built to scale, Azure Pack provides the ability to quickly grow and change with evolving customer needs.

Hybrid ready

Our Azure Pack Private Cloud is hybrid ready, providing you with an easy to manage, comprehensive infrastructure solution.

Strong data protection

When you combine the built-in security of Microsoft Azure Pack and guaranteed data residency in the EU, we enable a secure cloud environment that allows easy compliance with European data protection laws.

Windows Azure Pack: packed with features

Comprehensive Certifications

Our certifications include ISO 27001, PCI DSS, SOCI, HIPAA, and NEN 7510, ensuring industry compliance, security, and peace of mind.

Familiar Microsoft environment

Because Azure Pack is built with the familiar Microsoft environment, it reduces the learning curve for the platform, allowing you to get started quickly.

No additional Windows licenses needed

Unlike platforms that require you to purchase additional licenses, when you base your private cloud on Azure Pack, licenses for your Windows instances are already included.

Easy on premises to data center migration

Currently hosting your infrastructure on premise? We make it easy to migrate to our data centers by providing you with everything you need to get your private cloud up and running in no time.

No overbooking

We never overbook our data centers, so when you get Azure Pack from LeaseWeb you can be sure that all you'll always have the resources you need to run all of your applications.

Designed with Managed Service Providers in mind

As an MSP/IT services firm, you need the flexibility to keep pace with customer demands as technologies continue to evolve. One of the most important parts of this is the ability to handle hybrid cloud infrastructure, and one of the best platforms to accomplish this is Microsoft Azure. With Leaseweb's Azure Pack powered private cloud, you can offer your customer hybrid capabilities, seamless compatibility with Microsoft services, and the security of European data protection laws.
