Get lightning-fast performance with our next-gen CDN

Built on our globally distributed network, the Leaseweb CDN combines our hardware and network expertise to bring you closer to your users and delivers your content anywhere, anytime with lower latency and increased performance.

Without Leaseweb CDN
Content is all served from the origin location. This uses processing power and bandwidth, resulting in content taking longer to reach the user, increased load, and an inferior user experience.

With Leaseweb CDN
Content is served from the closest Leaseweb CDN cache. This reduces load on your origin servers and provides content faster to the user, resulting in a superior user experience.

What we offer
1. Better user experience
   Avoid slow loading pages and long buffer times and ensure high-quality experiences for your audience.
2. Lower Infrastructure Cost
   Reduce costs by using our network and infrastructure rather than your own.
3. Increased Security
   Attacks are routed through our servers so we can mitigate the attack before it reaches your origin.

Benefits:
1. Latest Technology
2. Optimized for video streaming
3. Large file distribution
4. Maximum Offload
5. 24/7 Support
6. Transparent pricing

Looking for additional options and features or higher bandwidth at prices as low as €3 per TB overage? Get in touch to discuss the possibilities.

Features

CDN Resources
- Unlimited zones/domains
- Instant purge
- Pre-fetch files functionality
- Header modification
- Cache expiry settings
- Cache query strings
- Ignore set cookies
- Bandwidth throttling

Reporting and Analytics
- Real time analytics
- Bandwidth and traffic graphs
- Cache hit/miss ratio
- HTTP status code reporting
- View data between specific time frames
- Report/statistics through your dashboard or API

Security
- SSL Certification
- Secure Token URL
- Geoblocking
- Hotlinking Protection
- IP/Domain blacklisting
- DDoS protection

Object Storage
- Replicated 3 times
- S3 compatible
- Top-notch security
- Read more on the Object Storage page

Network
- Global network with more than 5 Tbps capacity
- Up-to-the-minute status updates
- Full control over the entire global network
- DNS anycast network

Billing
- Electronic invoices
- Payment history
- Flexible payment methods (transfer, PayPal, credit card, direct debit)
