

Better user-experiences through more coverage, performance and redundancy

What we offer

1. Advanced Self-Service Portal

Configure all the extensive features needed to optimize content distribution.

2. Unified Reporting

All key metrics are aggregated and presented standardized across the CDNs.

3. Larger Coverage

More PoPs in more geographical areas, including South America, the Middle East, Russia and Australia

4. Performance-Based

Optimal PoP is selected based on its performance.

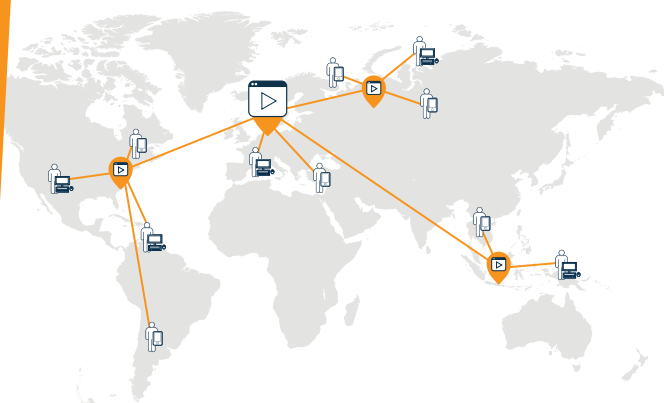

5. 24/7 Support

Personal support during business hours plus an always-available knowledge base

6. Transparent Pricing

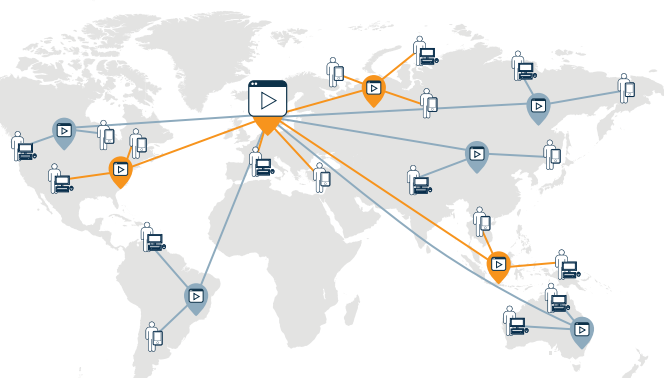

Including SSL-traffic across CDN providers.

The LeaseWeb Multi-CDN combines multiple CDN provider networks to guarantee an optimal experience for your audience. The best PoP is selected based on its performance metrics to distribute your content.

Leaseweb CDN

Content is mainly served from the closest LeaseWeb CDN server. End-user experience will improve drastically when there is a PoP closeby.

Leaseweb Multi-CDN

Content is served from the closest LeaseWeb Multi-CDN PoP. with 100+ PoPs your end-users can connect to, a better quality experience is guaranteed for an even larger audience.
